A cute game where you play as a curious Lovecraftian creature who either drowns people or gives them balloons :3. Indie Game Battle started out very rough, but week by week, it's shaping up to be a viable fighting game, and the cast just keeps expanding with more and more well-known indie favorites. While the menu screens continue to tax my machine harder than the game itself for some reason, and I do feel like the roster relies a little heavy on first-party characters, these are two extremely minor quibbles in an otherwise fine piece of work, and I feel that any misgivings that I have will be put to bed by the end of the game's development.. It is fun trying to achieve 60 seconds on Easy/Normal/Hard.

Managed to get 80s on easy in the first few tries, and then got stuck into normal/hard around 40s. However, since the music and the arrows aren't quite in sync, you are free to play with your own music.

Fun game to play while you just want to listen to music.. An okay game.

The game is actually fun on easy. However (and this is a BIG however) On hard (as there are only two difficulty levels) The game become pretty much unplayable. The games so-called realistic car physics make the game unplayable. Steering is lousy and unresponsive at the best of times and this becomes more of a problem given that your vehicle gets hung up on every sudden change in the course. If you get turned around (and you will be a lot) You'll most likely of lost whatever lead you had by the time you start to face the right direction.

I actually had to drive backwards for 3/4 of a lap just to come in 3rd. If you get knocked off the track (during a pile up on a corner most of the time) you wont be able to get back on it. and killing yourself with your own mines won't help either. you can drive until you fall off the map entirely (which wont kill you by the way) the only way to get back to the game is to quit. There is no retry on hard so you'll automatically get 4th for that race. If you are looking for a casual racing game I'm sure you can find a better game elsewhere. or at least one that dosen't feel like a like self abuse.

But like I said before. On Easy. The game is sorta fun.. I'm here to reap the karma.. **[I'm not here to talk about the fact that there is no 18+ sh\*t for this movie]**

**I just want to say that this was the first experience if even had with any kind of anime, and this is probably also the best movie/ series i'll ever watch!**

**Not gonna lie, the drawings and animations are AMAZING!  
The storyline is also really good, kept me interested all the time!**

**Wouldt totally recommend this to anyone who is looking for a awesome movie, and isn't afraid to spend some money on it!**

**Btw, Chocolate is \u2665\u2665\u2665\u2665ing ADORABLE!**

**\* And yea, I know there is also a lot of 18+ and sexual bullsh\*t around, but I am not going for that... \***

this game is epic (please add multiplayer mode). It have some bugs and problems, Im sure that some will be fixed and some will stay. But still it's the best motogp game in series - better graphic than 17, better physics, sounds are also little bit more tweaked, AI is now fast, career mode look interesting. So if you like motorcycles/motogp then go and buy it, but remember that it has some mistakes. :). I'm a very big fan of sapper, and I liked this game. The non-standard approach introduces novelty, though the very implementation with hexagons came out rather mediocre. It is rather independent of the usual sapper. So go, take it.. i cannot recommend this game (and the two previous instalments) enough. definitely worth the money.. It doesnt teach you how to program, its early july and the second ep isnt out yet (by complaining about it, it means I really want the second ep). Buy it!. What we all thought was an April fools joke turned into a beautiful new DLC for OJ! These two are great additions to an already amazing game.

..Star Breaker forever!. cute. Recommended for kid :D. this good kill time. Beautiful escaping room with various puzzles. Definitely recommend.

What games we call good game? Skipping many criteria, I would call it good if I enjoyed even though not my genre. Moreover if it makes me love that genre, it would be a Great.

Forgotten Chambers was in somewhere between them for me. Did not like room escape, never interested in VR. But, after played this game, I started to think VR headsets may worth buying.

As you can see, it has beautiful scenes and great atmosphere. You will experience fantastic with VR. Someone who focus only solving puzzles, may feel the game is too short. However, if you enjoy looking around and playing with objects, it would be not much short.. So far not worth it... would have played longer if the game hadn't crashed. (might give it another go later)

So few words about it, the trailer video gave a really nice impression of the game, like there would be a deep story or characters with brilliant personalities. But immediately after starting the game I was stunned by the lack of, well any and all of what i consider a story. You're thrown into this world with very little knowledge of what's going on and zero backstory. I mean cmon, what i learned was basicly that the main heroine is a CEO or something and the first words i hear from her mouth is "i wanna go for an adventure!". There's no story arc (atleast not in the begining, what i consider pretty important) to immerse the player into the game, nor even clear directions, the first area is a big\u2665\u2665\u2665\u2665building and i had no idea where i was supposed to go.

Really i will try it again because i wasted my money on this, had there been a review telling me anything above i wouldn't have bought it.
